

I have just been notified that the FCC wants to make LPFM stations priority over the current FM translator services. In result of this, the signal for the radio station K-LOVE may then be lost. Please don't let this happen. K-LOVE is more than just an ordinary radio station. It reaches out to thousands of people and makes all of their lives better. More and more people benefit from K-LOVE each day. If it were replaced by a LPFM broadcaster many lives would be crushed. K-LOVE brings God into people's heart all day and without that many people, including myself, would have a gap between God and ourselves. Whether or not the person reading this is a believer, you must understand the joy and happiness this brings to people. There have been lives saved from suicide and many other daily troubles that people have. K-LOVE is so good to the community for spiritual reasons and for non-spiritual reasons. Please make sure that people across America don't have to live without the inspirations this station brings.
